

Documenting a chlamydia consultation

The autofill (Best Practice) or management/comment (Medical Director) shortcut function in your medical practice software can be used to quickly insert information about chlamydia management and into patient notes during a consult.

You can tailor the specific text to your own needs. Some suggestions for chlamydia management autofill text are provided below.

Shortcut	Text
CTMX	Asked about PID symptoms (new onset lower abdominal pain? Dyspareunia?)
	Partner management discussed
	Retesting organised for 3 months from today [insert date] via [insert method]
	Need more chlamydia management information and resources? Copy and paste this link into your web browser: https://www.mocca.org.au
