

## Insert a link to the MoCCA website into Medical Director software

If you use Medical Director, you can insert a link to the website in your software.

You can do this within a patient file, or on the medical director homepage, whichever is easier for you.

1. Go to tools and click options. This will open the options box.
2. Go to the web buttons section. In Button 1 or 2 enter the name of the website under caption, and the URL in the URL box. For example, you could enter 'MoCCA' into the caption and <https://www.mocca.org.au> as the URL.
3. Select save
4. Your customised button will now appear in the bottom right hand of the patient record. You can click on the button at any time to open the MoCCA webpage.
